Bill Gesora – Senior Data Analyst | Analytics Engineer | BI Specialist

Nairobi, Kenya | +254706545051 | gesorabill@gmail.com | Linkedin/bill-gesora

Professional Summary

Senior Data Analyst and Analytics Engineer with 9+ years of experience delivering analytics, business intelligence, and data engineering solutions across gaming, financial services, insurance, and technology organizations. Extensive expertise in Azure (Synapse, Data Factory, Fabric, Dataverse, Data Lake Gen2), dbt, and modern data architectures, supporting scalable ETL/ELT pipelines, medallion frameworks, and near-real-time analytics. Highly proficient in SQL, Python, and Power BI, enabling data models and reporting solutions that process tens of millions of records while maintaining strong data quality, governance, and performance. Trusted partner to executive stakeholders for KPI definition, analytics strategy, and data-driven decision-making.

Skills & Certifications

- **Data Engineering / Cloud**: Azure Synapse, Data Factory, Fabric, Dataverse, Data Lake Gen2, AWS, GCP BigQuery
- **ETL & Orchestration**: dbt, PySpark, ADF pipelines, Alteryx, Airflow, CI/CD, partitioning & incremental logic
- **Programming / Analytics**: SQL (T-SQL, PL/SQL, MySQL), Python (pandas, PySpark), R, KQL
- **Visualization & BI**: Power BI (advanced DAX, semantic models, SVG visuals), Tableau, QlikView, R Shiny
- **Governance & Quality**: Medallion architecture, data validation, error logging, monitoring frameworks
- **Certifications**: Microsoft Certified: Data Analyst Associate (DA-100), Fabric Analytics Engineer Associate (DP-600)

Professional Experience

Senior Data Analyst (November 2025 – Present)
Sportpesa

- Architected and maintained analytics pipelines processing high-volume betting and transactional data from MySQL databases, event streams, partner feeds, and internal systems for enterprise reporting.
- Structured scalable SQL-based data models supporting revenue, GGR, jackpot, and customer activity analysis across Kenya, Tanzania, South Africa, and international markets.
- Established incremental and partitioned data processing strategies to efficiently manage tens of millions of records, ensuring reliable daily and near-real-time refresh cycles.
- Engineered secure Power BI semantic datasets incorporating advanced DAX logic for KPI reporting, dynamic currency conversion, and cross-market analysis.
- Delivered executive dashboards enabling leadership to monitor commercial performance, jackpot distribution, customer engagement, and operational KPIs with minimal latency.
- Produced retention, cohort, and lifecycle analysis models to identify churn patterns and re-engagement opportunities.
- Collaborated with commercial, marketing, and operations teams to define KPIs, align analytics outputs with business strategy, and convert insights into actionable initiatives.
- Standardized metric definitions and reporting logic to ensure consistency across regions, currencies, and stakeholder groups.

Key Projects & Achievements:

- Consolidated multi-country gaming analytics into a unified data model, significantly improving cross-market visibility and reporting consistency.
- Cut reporting turnaround time from hours to minutes by optimizing SQL transformations and enabling incremental refresh in Power BI.
- Enabled data-driven leadership reviews through executive dashboards adopted for weekly and monthly performance meetings.

Senior Data Analyst (September 2023 – Present)
Mesh Life

- Established ETL workflows ingesting data from Google Sheets, GA4, Amplitude, MongoDB, and partner APIs into centralized analytics storage for advanced analysis.
- Integrated GA4, BigQuery, and Azure Synapse pipelines to unify customer engagement and content analytics across digital platforms.
- Constructed retention and cohort analysis models empowering product teams to track growth, engagement, and user lifecycle performance.
- Produced Looker and Amplitude dashboards monitoring daily active users, acquisition funnels, and marketing

performance.
- Worked closely with marketing and product stakeholders to define KPIs and align reporting with growth and engagement objectives.
- Supported external partners with real-time dashboards to monitor project and campaign performance.
- Delivered Power BI datasets and reports with advanced DAX calculations to support executive-level KPI monitoring and custom analytics.

Key Projects & Achievements:

- Enabled near-real-time analytics (<5 seconds latency) using Synapse Link and event streaming, replacing batch-based reporting.
- Delivered an engagement retention model that improved campaign targeting effectiveness by approximately 30%.

Data Migration & Analytics Specialist (March 2023 – Present)
Mint Technologies, Remote (Contractual Agreements)

- Led enterprise-scale data migration initiatives for Microsoft Dynamics 365 CRM, mapping legacy ERP and CRM entities into Dataverse with strong governance controls.
- Implemented scalable data ingestion and transformation pipelines using Azure Synapse, Data Factory, and Microsoft Fabric to support enterprise analytics workloads.
- Unified customer, people, and operational datasets into Snowflake and Fabric environments to enable advanced analytics and Power BI reporting.
- Coordinated with business and technical stakeholders to validate migration strategies, ensure regulatory compliance, and deliver analytics-ready datasets.
- Improved data load performance and cost efficiency through incremental and partitioned processing approaches.

Key Projects & Achievements:

- Delivered a centralized data warehouse for a multinational organization, increasing data accessibility by 60%.
- Implemented Customer 360 analytics solutions across multiple African banks using Fabric and Dataverse.
- Executed hybrid data architectures supporting large-scale banking environments across Africa.

Senior Data Analyst (September 2021 – December 2022)
Netlify, Remote

- Established ELT workflows leveraging Snowflake, dbt, and Python to enhance data processing efficiency and reliability.
- Created Mode Analytics dashboards providing visibility into product usage, customer engagement, and platform performance.
- Performed A/B testing and statistical analysis to inform product optimization and growth initiatives.
- Streamlined orchestration workflows using Apache Airflow, reducing processing times for critical pipelines.

Key Projects & Achievements:

- Built subscription growth models with dbt and Snowflake, improving forecasting accuracy by 25%.
- Reduced manual reporting effort by approximately 15 hours per week through automated product usage reporting.
- Defined and documented a billing cost-driver framework adopted by finance and product teams.

Data Analytics [Analyst -> Senior Analyst -> Consultant] (October 2016 – August 2021)
Deloitte East Africa

- Delivered analytics and reporting solutions across banking, insurance, and enterprise clients using Azure, Snowflake, Tableau, and Power BI.
- Constructed scalable data warehouses and analytics pipelines to support financial, regulatory, and operational reporting.
- Produced dashboards, scorecards, and analytical models, translating complex datasets into actionable business insights.
- Mentored junior analysts on dimensional modeling, analytics engineering practices, and data quality standards.
- Served as analytics subject-matter expert, supporting ad-hoc analysis, executive reporting, and stakeholder decision-making.

Key Projects & Achievements:

- Delivered automated IFRS17 analytics solutions for multiple insurance providers across East Africa.
- Led SQL-based analytics training programs for a regional banking client.
- Contributed to Deloitte Academy analytics learning content spanning multiple industries.
- Deployed a secure on-premises Power BI Report Server supporting executive reporting needs.

Education

MSc Computer Science
University of East London (2024 – Ongoing)

Bachelor of Science in Mathematics and Computer Science
Jomo Kenyatta University of Agriculture and Technology (2012 – 2016)

Languages

- Fluent in English
- Fluent in Swahili
